

ANUDEEP BURRA

Junior SQL Data Analyst | SQL, Data Validation, Power BI & Reporting

Sheffield, UK | +44 7587 975094 | anudeepburra18@gmail.com | linkedin.com/in/anudeepburra | github.com/Anudeep151998

UK Graduate Route Visa Holder — No Sponsorship Required

PROFESSIONAL SUMMARY

Numerate, detail-focused Data Analyst with an MSc in Computing (Merit) from Sheffield Hallam University and over 2 years' experience at Infosys performing SQL-based data extraction, validation, reconciliation and quality assurance across enterprise banking and CRM systems. Experienced in producing management information, KPI reports and dashboards, analysing large datasets to identify trends, and supporting forecasting and business decisions. Hands-on project experience building SQL-driven analysis, interactive dashboards and automated data pipelines in Python, with strong Microsoft Excel skills and a fast-learning, proactive approach to new reporting tools, currently building skills in Power BI and Microsoft Fabric/Azure. Comfortable working in controlled, audited environments with clear documentation, strong attention to detail and good communication skills across technical and non-technical teams. UK Graduate Route visa holder — eligible to work immediately, no sponsorship required.

CORE SKILLS

- **SQL & Data Extraction:** complex queries, joins, filters, aggregations, data extraction and manipulation, schema and semantic layer design (MySQL, PostgreSQL, SQLite); adapting quickly to new SQL dialects such as Snowflake
- **Reporting & Visualisation:** management information (MI) reporting, KPI reporting, ad hoc reports, dashboard design with Matplotlib, Seaborn and Streamlit; currently learning Power BI for enterprise reporting
- **Microsoft Excel:** formulas, pivot tables, data checks, reporting and analysis of large datasets
- **Data Validation, Testing & Reconciliation:** backend data validation, migration testing, reconciliation across high-volume datasets, structured test case design, functional/regression/UAT testing, defect lifecycle management (Jira, HP ALM)
- **Python (Pandas):** data cleaning, validation, exploratory analysis, workflow automation
- **Engineering Practices:** Git/GitHub version control, CI/CD-style pipeline automation, SDLC/STLC, Agile/Scrum, documented and auditable delivery in controlled environments
- **Cloud & Platforms:** AWS (EC2, CloudWatch, S3 basics), Supabase, Render Cloud; building toward Azure and Microsoft Fabric

DATA PROJECTS

IPL Data Analysis Dashboard

Python, SQL, SQLite, Pandas, Matplotlib, Seaborn, Streamlit

- Ingested and analysed 260,000+ ball-by-ball IPL cricket records (2008-2020) using Python and Pandas, loading them into a SQLite database for structured querying and reconciliation.
- Authored 6 analytical SQL queries to surface team performance trends, top batsmen/bowlers, win-rate analysis, toss decisions and player-of-the-match leaderboards.
- Built a 4-chart interactive dashboard (Matplotlib/Seaborn), deployed on Streamlit Cloud with season filters and KPI metric cards for self-serve analysis, mirroring the governed, filterable dashboard style used in enterprise BI tools.
- Communicated key insights clearly to non-technical audiences, for example Mumbai Indians lead all-time wins with 144, and 64 percent of teams elect to field after winning the toss.

Automated Job Market Intelligence Pipeline

Python, REST API, Pandas, PostgreSQL, SQLAlchemy

- Built a daily-refreshed pipeline ingesting live job postings via the Adzuna REST API, cleaning and standardising data with Pandas for downstream analysis.
- Designed a clean relational schema in PostgreSQL (Supabase), enabling reliable querying, data modelling and trend analysis on job market data.
- Automated the full ingestion-to-analysis workflow using scheduled cron jobs and CI/CD, ensuring data freshness without manual intervention, applying version control and repeatable deployment principles.

PROFESSIONAL EXPERIENCE

Test Engineer - QA & Application Support — Infosys Ltd, India Apr 2022 - Dec 2023

- Performed backend SQL data validation and migration testing across enterprise CRM and core banking systems, identifying and resolving 50+ data discrepancies through rigorous reconciliation.
- Designed and executed 200+ structured test cases per release using HP ALM, maintaining a zero critical-defect escape rate across 3 consecutive releases, demonstrating strong grounding in data accuracy, quality control and auditable evidence.
- Delivered end-to-end QA across 5+ production releases, covering functional, system, integration, regression and UAT cycles within established SDLC and change control processes.
- Owned the defect lifecycle in Jira, collaborating cross-functionally with developers and business analysts to investigate, triage and resolve data and application issues, producing clear documentation and traceable evidence.

Systems Engineer (Training) — Infosys Ltd, India Jan 2022 - Mar 2022

- Completed structured training in SDLC, STLC, Agile, Java SE 8 and Selenium WebDriver; certified in Agile Developer and Java SE 8.

Data Science Intern — Innomatics Research Labs, India Aug 2021 - Dec 2021

- Completed a part-time data science internship focused on Python programming, data analysis and visualisation using NumPy, Pandas, Matplotlib and Seaborn.
- Built interactive dashboards with Streamlit and a web app with Flask, gaining early hands-on exposure to full-stack data application development and reporting.

EDUCATION

MSc Computing (Merit) — Sheffield Hallam University, UK 2024 - 2025

B.Tech Electronics & Communication Engineering — Guru Nanak Institutions Technical Campus, India 2016 - 2020

PROFESSIONAL DEVELOPMENT

- Introduction to SQL - SimpliLearn (SkillUp)
- Skills & Best Practices for Cloud Support Associates - Coursera
- Introduction to Information Technology & AWS Cloud - Coursera
- Cloud Platform Job Simulation - Forage
- Agile Developer Certification - Infosys | Java SE 8 Certification - Infosys

ACHIEVEMENTS

- Best Performer Award - Infosys (DDO Project)
- 3rd Place, Cloud Computing Hackathon - Sheffield Hallam University

WORK AUTHORISATION

Eligible to work in the United Kingdom on the Graduate Route visa - no sponsorship required.
